PROFILE

A Computer Science student developing a strong foundation in web development and UI/UX design. I focus on front-end development while exploring back-end programming to build a complete full-stack skill set, aiming to apply my knowledge in real projects and gain practical experience in both design and development.

CERTIFICATIONS

- **Start the UX Design Process: Empathize, Define, and Ideate**
- **Data Science Foundations: Fundamentals (2022)**
- **Object-Oriented Programming with C#**

PROJECTS

AutoVision

- An Android Application that detects exterior sedan damages and generate estimation cost repairs.

Enrollment System

- Java application with an SQL database that centralizes academic management for students, teachers, and administrators.

E-shop Website

- A simple online shopping platform that caters on computer parts and peripherals.
